**(54) WASHING BAG**

(57) Abstract:

**PROBLEM TO BE SOLVED:** To prevent generation of a run of a stocking and deviation of washing, by sewing outer edges of longitudinal and lateral cloud shaped net cloth together and folding into a spherical or near-spherical shape with an input/output port.

**SOLUTION:** Longitudinal deformed cloud shaped cloth 2 is laid on lateral deformed cloud shaped cloth 3 and each of outer edge parts 2a and 3a, and 2b and 3b are sewn together. The longitudinal deformed cloud shaped net cloth 2 is folded forward at folding lines 2e and 3e and sewn outer edges 2a and 3a are sewn to 2c, and 2b and 3b to 2d. Outer edge parts 2m and 3m of the both net cloth 2 and 3 except the folding line parts 2e and 3e are sewn together to form a spherical or near-spherical shaped washing bag 1. Since this washing bag does not use a fastener, there is no fear to generate a run of a stocking. Since the shape is spherical or nearly-spherical, washing is not deviated.

## DETAILED DESCRIPTION

## [Detailed Description of the Invention]

[0001]

[Industrial Application] When taking a stocking in and out in a wash bag, this invention is hooked on a fastener, and it relates to the wash bag made without the fastener so that it may not \*\*\*\*.

[0002]

[Description of the Prior Art] When going the washing in and out, it hooks on a fastener and the stocking might be made to \*\*\*\* conventionally, since the fastener was used.

[0003]

[Problem(s) to be Solved by the Invention] This had a defect like the next.

(b) When going the washing in and out, it hooks on a fastener and the stocking might be made to \*\*\*\*, since the fastener was used.

(b) Although there was a superficial wash bag, deviation and dirt omission had the bad washing in the wash bag.

This invention is made in order to remove these defects.

[0004]

## [Means for Solving the Problem]

[Drawing 2] the shape of an oblong deformation cloud type which it is alike and exists -- reticulated -- a ground 3 top -- the shape of a longwise deformation cloud type -- reticulated -- although the ground 2 is carried, 2a, 3a, 2b, and 3b are doubled, and the periphery edge is sutured. And [Drawing 3] \*\* -- like, 2a, 3a, 2c and sutured 2b, 3b, and 2d of bend lines 2e and 3e which bent to the front by the way, and were sutured are doubled, and a periphery edge is sutured. Furthermore, [Drawing 4] \*\* -- like -- the portion of bend lines 2e and 3e -- removing -- the shape of an oblong deformation cloud type -- reticulated -- the shape of 3m of periphery edges of the ground 3, and a longwise deformation cloud type -- reticulated -- 2m of periphery edges of the ground 2 -- suturing -- [Drawing 1] \*\* -- the globular form or almost globular form wash bag 1 which formed the receipts-and-payments opening 4 is produced like. This invention is a wash bag which consists of the above configurations.

[0005]

[Function] When washing the washing with a washer, in order to prevent a pain and slag, the washing is put into a wash bag and washed, but if the washing is put in and washed from the receipts-and-payments opening 4 and wash finishes, the washing will be taken out from the receipts-and-payments opening 4.

[0006]

[Example] Hereafter, the example of this invention is explained.

(b)

[Drawing 2] the shape of an oblong deformation cloud type which it is alike and exists -- reticulated -- a ground 3 top -- the shape of a longwise deformation cloud type -- reticulated -- although the ground 2 is carried, 2a, 3a, 2b, and 3b are doubled, and the periphery edge is sutured.

(b)

[Drawing 3] \*\* -- like, 2a, 3a, 2c and sutured 2b, 3b, and 2d of bend lines 2e and 3e which bent to the front by the way, and were sutured are doubled, and a periphery edge is sutured.

(c)

[Drawing 4] \*\* -- like -- the portion of bend lines 2e and 3e -- removing -- the shape of an oblong deformation cloud type -- reticulated -- the shape of 3m of periphery edges of the ground 3, and a longwise deformation cloud type -- reticulated -- 2m of periphery edges of the ground 2 -- suturing -- [Drawing 1] \*\* -- the globular form or almost globular form wash bag 1 which formed the receipts-and-payments opening 4 is produced like. When using this with the above structures and it washes the washing with a washer, the washing is put into a wash bag and this invention washes it, in order to prevent a pain and slag, but if the washing is put in and washed from the receipts-and-payments opening 4 and wash finishes, it will take out the washing from the receipts-and-payments opening 4.

[0007]

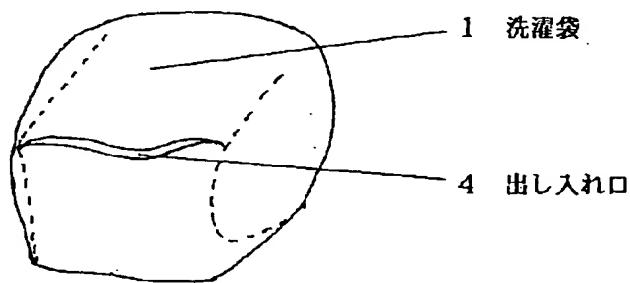

## [Effect of the Invention]

(b) When going the washing in and out, hook on a fastener and don't make a stocking \*\*\*\*, since a fastener is not used.

(b) a globular form -- or since it is a globular form mostly, the washing is washable uniformly.
